Guiding Good Choices (GGC) is a 5-week evidence-based educational program that provides users with the knowledge and skills needed to guide children through early adolescence. It seeks to strengthen and clarify family expectations for behavior, enhance the conditions that promote bonding within the family, and teach skills that allow children to resist drug use successfully. GGC is based on research that shows that consistent, positive parental involvement is important to helping children resist substance use and other antisocial behaviors. Sessions are interactive and skill based, with activity handouts, discussion topics, skill-building exercises, and information on positive parenting.

* July 11th will be a financial resource class, that is separate from the GGC Seminar.

All are welcome to attend!
